December 4, 2007

To: Fellow Track Operators
Ref: Track Scrubber

In April of 2006, we took delivery of a Power Boss track scrubber from Steve Garrett at Wayne's Industrial. We have used the machine for two complete seasons and next to the "Christmas Tree," it is the most important piece of equipment at the facility! We, as well as the racers, have full confidence that the track will be as good if not better than it was before every clean-up.

We chose to lease the machine and have calculated that the monthly lease payment is almost entirely offset by the cost savings from its use. The cost savings is realized from not having to re-spray VHT after the clean-up plus the cost of the soap is less than the absorbent we previously used. Add to that the savings from quicker clean-ups in payroll and the light bill, and we can just about pay the monthly lease from the savings on expenses we were already paying.

Other uses we have found for the scrubber include: getting water off the track after a shower, a better racing surface on our pro shows from scrubbing the track before spraying VHT and a quick and easy way to get pollen off the track (a problem we have at MIR due to being surrounded by trees).

Steve has been great to work with and has followed up on every need we have had for service and questions. In closing we would highly recommend this track scrubber and Wayne's Industrial to anyone, it has been a tremendous asset to us.

Sincerely,

Royce Miller
